

HARVEY LAKE EURASIAN WATERMILFOIL

Recently the Lake County Health Department performed a survey of Harvey Lake and found that Eurasian Watermilfoil has reached nuisance levels and is causing negative consequences to the lake's native plant communities. Working with the Lake County Health Department, the Village of Vernon Hills contracted with McCloud Aquatic Services to apply an herbicide application to control the Eurasian Watermilfoil. Work was completed in May 2013.

Outlined in the map below shows where Eurasian Watermilfoil is located.
