

Halloween Safety Tips

Always carry a flashlight and watch for cars

Buy costumes that are made of flame-retardant material.

Consider placing individually packaged candy on a table and let them take it themselves.

Do not trick-or-treat if you or a family member is not feeling well; if you are waiting for COVID-19 test results or know that you have been exposed to COVID-19.

Eat candy only after your parents check it.

Face coverings should be worn by all participants over the age of two; including individuals passing out treats.

Go only to houses with lights on.

Help your pets stay safe! Costumed strangers may frighten them, so keep them inside.

Instead of waiting at the doorway for trick-or-treaters, use an area in your driveway or lawn to set out treats on a table.

Jackets should be worn over costumes on cool Halloween nights.

Know how and where to contact your parents.

Look both ways before crossing the street.

Maintain at least 6 ft distance between groups.

Never trick-or-treat alone and never enter a stranger's home.

Only eat candy after your parents have checked it.

Props such as a sword or wand should only be flexible toys.

Quit trick-or-treating at 6:00 pm.

Remember to walk, and not run, between houses.

Stay on sidewalks as much as possible.

Trick-or-treat as a household, avoiding groups of others.

Use hand sanitizer often.

Visit only familiar houses that are lit.

Wear masks, especially ones that don't block your vision.

EXercise caution.

Young children of any age should be accompanied by an adult.

Zip your lips until your candy is checked!

Happy Halloween 

Thank everyone for their treats.
