

The Public Works Department has awarded a contract to Winkler's Tree Service to trim the parkway trees on specific streets in an effort to supplement our in-house tree trimming program. They have been instructed to prune the trees to the same high standards that we ourselves use, which is the American National Standards Institute (ANSI) A-300 Pruning Standards. The reasons for trimming are as follows:

1. Safety- Trees must be trimmed up high enough to prevent injury to people and damage to property and vehicles.
2. Health- By removing some of the branches within the trees canopy we are able to promote better tree health by reducing the ability of a disease or insect infestation to get started and to make the tree less likely to break in high winds.
3. Aesthetics- When the trees are trimmed and low limbs are removed, we are able to train the tree so that large limbs will not have to be removed later to provide clearance. Trimming also will allow other plants room to grow thus preventing overcrowding.

**Special Notes:**

Under NO circumstances will trees be TOPPED! Topping is the practice of reducing a trees size by cutting the upper limbs back to a common point. This practice, which used to be common, will not be allowed as it has been found to weaken the tree and invite infection and decay. We also no longer use wound paint on the cuts. This practice also has been found to be detrimental to the tree and invites infection and decay.

Due to the existence of the Emerald Ash Borer (EAB) in the Village, we have instructed our contractor to only trim ash trees to provide clearance from the roadway, sidewalk, street lights and signage. They will also remove any large dead limbs that may be a hazard. Doing so will save funds that can be used to help replace ash trees that succumb to EAB.

Our contractors are scheduled to begin late November into early December, and will move as quickly as possible to complete their work. In most cases they should be able to complete the work in front of your home in one day so that you will have minimal inconvenience. The contractor will not begin working until after 7am on weekdays and 8:30 on Saturdays, they will stop working at 5pm on all days and will not work on Sundays. They will also make every effort to not block the street or your driveway to allow you access to your home the majority of the time. There may be times however, when your driveway may be blocked for a short time and the Contractor will be happy to remove the debris should you need to get your vehicle out of your driveway during this time. All branches and other debris will be cleaned up before the end of each day.

If you should have any questions about the tree trimming please call Ken Loar, Village Arborist, at (847) 680-2268.

# **Tree Trimming Street Locations**

## **Grosse Pointe**

- Fiore Pkwy (E. of Grosse Pointe Blvd)
- Pontiac Lane
- Julie Lane
- Belle Isle Lane
- Sterling Heights Road
- Saugatuck Trail
- Tennis Lane
- Alfred Court
- Shelby Court
- Marquette Court
- Royal Oak Drive (S. of Northfield Drive)
- St. Clair Lane
- Dawson Court

## **Country Club Estates**

- Cherry Valley Road
- Court of Shorewood
- Court of Ash
- Richard Court
- Court of Elm
- Green Briar Lane
- Lakeside Drive
- Westmoreland Drive

## **Deerpath**

- Sullivan Drive from Aspen Drive to East of Deerpath Drive along the bike path.
